

Being a Belton Geographer I must:-

Have a curiosity and fascination about the world

Pursue a line of enquiry to answer a relevant geographical question

Understand where I live in relation to the rest of the world

Have a knowledge about diverse places, people, resources and natural and physical processes.

Compare my findings and reach an answer to a question.

Give views on places, fieldwork and features of the world around us.

Research information and present what I have learnt in Geography

Use geographical skills and techniques through fieldwork
Eg map skills

Apply skills and processes to finding, selecting, analysing and interpreting primary and secondary sources of evidence

Geography is a science that deals with Earth's surface. People who study geography are called geographers. Geographers are interested in Earth's physical features, such as mountains, deserts, rivers, and oceans. They are also interested in the ways that people affect and are affected by the natural world.
