

## Beltor Primary Schoot

 EYFS Maths Policy
## Intent

Our whole school approach to the teaching of mathematics aims to give all of our pupils the opportunity to develop their skills in the three aims of mathematics - Fluency, Reasoning and Problem Solving. We teach a mastery curriculum, ensuring pupils have access to a wide range of activities to practise each skill and all abilities must have the opportunities to reason and problern solve. We aim for all pupils to be able to describe, explain, corvince, justify and prove their answers.

## Implementation

At Belton Primary school, we follow the White Rose planning for Maths. This ensures, that the positive stant the pupils, make in the Eanly Years, continues, with clean prognession and consistency throughout the school.

Planning is split into three week units.

|  | Week $1$ | Week $2$ | Week | Week 4 | $\begin{aligned} & \text { Week } \\ & \hline \end{aligned}$ | Week 6 | Week 7 | Week 8 | Week $9$ | Week 10 | Week 11 | Week 12 | Week 13 | Week 14 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| C $\frac{1}{2}$ $\frac{3}{3}$ | Getting to Know You |  |  | Just Like Me! |  |  | It's Me 123 ! |  |  | Light and Dark |  |  | Consolidation |  |
| - | Alive in 5! |  |  | Growing$6,7,8$ |  |  | Building 9 and 10 |  |  | Consolidation |  |  |  |  |
|  | To 20 and Beyond |  |  | First Then Now |  |  | Find My Pattern |  |  | On The Move |  |  |  |  |

| Week 1 | Week 2 | Week 3 |  | Week <br> 4 | Week 5 | Week 6 | Week 7 | Week 8 | Week 9 | Week 10 | Week 11 | Week 12 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| $\bar{\omega}$ $\stackrel{\rightharpoonup}{E}$ $\overline{3}$ | Building Numbers <br> Beyond 10 <br> Counting Patterns Beyond 10 |  |  | Adding More <br> Taking Away |  |  | Doubling Sharing \& Grouping Even \& Odd |  |  | Deepening Understanding Patterns and Relationships |  |  |
|  | Spatial Reasoning (1) Match, Rotate, Manipulate |  |  | Spatial Reasoning (2) Compose and Decompose |  |  | Spatial Reasoning (3) Visualise and Build |  |  | Spatial Reasoning (4) Mapping |  |  |

Our early years curriculum focuses on developing a really strong sense of numbers, to 10 . This will stand our pupils in good stead for the maths that follows as they mave throughout the school. They learn a deep understanding of the link between numbers and quantity and represent numbers, in many different ways.

Our pupils investigate how quantities are composed of smaller parts (e.g. 6 can be made of two 3 s on three 2s). They learn how numbers, relate to one another and learn to compane and onder them. They explore how quantities change when you add more items on take items away. Our pupils may be able to recite the number names to twenty and beyond but a sense of what those numbers mean develops gradually with repeated experiences with different contexts and that is what we create and teach within the Early Years, Foundation Stage.

## Mathematical Vocabulany

Mathematical vocabulany is an essential part of oun teaching which is built upon as each pupil progresses, throughout our school. We verbalise the thinking we would like our pupils to demonstrate e.g. "I can see five spots and two more so, I can start from 5... 5,6,7. There are 7 spots altogether". We use a 'my turn, your turn' approach with the teacher providing stem sentences for our pupils to communicate their ideas with mathematical precision and clanity. With lots of paired wark and practise, these sentences then become part of the children's every day vocabulary.

Our lessons are practical, hands on and engaging. They give our pupils the opportunity to use a variety of manipulatives such as Numicon, counting bears, tens, frames, part whole models, their fingers, counters, dice and playing cards.

Supponting Story Books
Story books ane used to help our pupils see maths in different contexts.

| How do Dinosaurs Count to 10? - Yolen \& Teague |
| :--- |
| One Gorilla - Atsuko Morozumi |
| Mouse Count - Ellen Stoll Walsh |
| Nine Naughty Kittens - Linda Jenny |
| Feast for 10 - Cathryn Falwell |
| Cockatoos - Quentin Blake |
| Mr Magnolia - Quentin Blake |
| Ten Black Dots - Donald Crews |
| The Napping House - Audrey Wood \& Don Wood |
| Engines Engines - L Bruce \& S Waterhouse |
| Mouse Shapes - Ellen Stoll Walsh |
| Changes Changes - Pat Hutchins |
| Pattern Bugs - Trudy Harris |
| Busy Busy Busy - Haneul Ddang |
| Pattern Fish - Trudy Harris |

## Enabling Classroom Environment

The classnoom learning environment is constructed to enable lots of opportunities for practical maths, experiences. Maths resources are freely available within the provision and our skilled adults model mathematical concepts through play and in real life contexts.

Fluency - Nor-negotiables
We believe that all pupils need to learn specific skills each year. Fluency demands more of learners, than memorisation of a single procedure on collection of facts. It encompasses, a mixture of efficiency, accuracy and flexibility to move between different contexts, making connections and recognising relationships.

The now-negotiables are taught and reinforced at the beginning of each lesson to enable fluency. Deepen thinking challenges are set within the provision to enable pupils to apply the information they have learnt. Adult-led activities are completed on a daily basis as part of the class Gold Stan Challenge and enable the class teacher to assess new learning.

EYFS Nor-negotiables,

| Autumn 1 | Autumn 2 | Spring 1 | Spring 2 | Summer 1 | Summer 2 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Say the number <br> names in order <br> to 5. | Say the number <br> names in order <br> to 10. | Begin to <br> recognise the <br> days of the <br> week. | Partition <br> numbers to 5 <br> into two groups. | Count forwards <br> and backwards <br> in ones from any <br> number up to <br> 10. | Count forwards <br> and backwards <br> in ones from any <br> number to 20. |

## The Counting Principles,

In the EYFS we have regard for the five counting principles.

The one-one principle. This involves children assigning one number name to each object that is being counted. Children need to ensure that they count each object only once ensuring they have counted every object.

Children will sometimes count objects more than once or miss an object out that needs to be counted. Encourage children to line up objects and touch each one as they count saying one number name per object. This will also help to avoid children counting more quickly than they touch the objects which again shows they have not grasped one-one correspondence.

1

2

3

4

5 have to be said in a certain order.

Children need to know all the number names for the amount in the group they are counting. Teachers can therefore encourage children to count aloud to larger numbers without expecting them to count that number of objects immediately.

The cardinal principle. Children understand that the number name assigned to the final object in a group is the total number of objects in that group.

In order to grasp this principle, children need to understand the one-one and stable-order principle. From a larger group, children select a given number and count them out. When asked 'how many?', children should be able to recall the final number they said. Children who have not grasped this principle will recount the whole group again.

The abstraction principle. This involves children understanding that anything can be counted including things that cannot be touched including sounds and movements egg. jumps.

When starting to count, many children rely on touching the objects in order to count accurately. Teachers can encourage abstraction on a daily basis by counting claps or clicks. They can also count imaginary objects in their head to encourage counting on, this involves the children visualising objects.

The order-irrelevance principle. This involves children understanding that the order we count a group of objects is irrelevant. There will still be the same number.

Encourage children to count objects, left to right, right to left, top to bottom and bottom to top. Once children have counted a group, move the objects and ask children how many there are, if they count them all again they have not fully grasped this principle.

## Impact

Our Early Years, Mathematics curriculum provides a good solid foundation for our mathematicians as they progress throughout the school. They have a strong sense of numbers to ter, a deep understanding of the link between number and quantity and are able to represent numbers in many different ways. They are able to use their maths skills in every day contexts including being able to subitise and can count on; knowing that they don't always have to start from the number one.

The childnerv enjoy their maths lessons, show resilience wher problem solving and leave the early years foundation stage ready to face the challenges of the maths curriculum throughout the remainder of their schooling life and beyond.
